

MALIKAL RIZKY

Senior Security Software Engineer

hi@malikal.dpdns.org | linkedin.com/in/mrizkyabdillah | github.com/malikalrizky

PROFESSIONAL SUMMARY

Security engineer with 6+ years across enterprise identity (SAML/OIDC, workload federation, PAM), cloud IAM governance, and SOC-scale detection and incident response. Built IAM automation and in-house SOC/SOAR platforms for regulated fintech (Bank Jago, BFI). AWS Cloud Architect; Certified Ethical Hacker.

EXPERIENCE

DKATALIS

Indonesia-headquartered fintech technology company · Regional collaboration: Indonesia and Singapore engineering and security stakeholders.

Promoted from Security Engineer — DevSecOps

Jan 2025 – Present | Full-time

- Lead incident command for identity and federation outages, cloud, endpoint, and phishing events; cut containment time 60%+ via SOAR enrichment, prioritization, and escalation.
 - Operationalize MITRE ATT&CK-aligned playbooks—enrichment, correlation, deduplication, automated triage—to raise analyst throughput and 24×7 consistency.
 - Built in-house SOC platform (correlation, threat intelligence enrichment, detection/response, blocking) for Bank Jago and BFI, reducing repetitive manual investigations.
 - Delivered IdP-integrated kill-switch automation to accelerate workforce and application access revocation during incidents.
 - Expanded detection coverage across multi-cloud, Kubernetes, and SaaS identity with Wazuh, Google Security Command Center, and CrowdStrike Falcon.
-

Jun 2024 – Dec 2024 | Full-time

- Owned IAM and identity security across AWS/GCP: least privilege, DLP, and periodic access reviews for Bank Jago and BFI.
- Led Wiz CSPM remediation across AWS/GCP; closed critical misconfigurations and reached maximum organizational posture score via IAM hardening and guardrails.
- Standardized SSO and identity lifecycle with Google Workspace SAML, OAuth2/OIDC, and automated offboarding to reduce orphaned access.
- Replaced long-lived keys with GitLab OIDC to GCP workload identity for GKE CI/CD at Bank Jago and BFI.
- Operated CyberArk PAM and built a self-service IAM platform with approvals, ephemeral access, and automated service-account key rotation.
- Automated GCP IAM and policy remediation with Terraform and Cloud Functions; embedded CI/CD secret scanning and IAM-as-code patterns in pipelines.

Grab

Singapore-headquartered superapp and technology company · Regional collaboration: Southeast Asia platform and product security stakeholders.

Dec 2023 – Jun 2024 | Full-time

- Built LLM-powered SAST/DAST triage engine, reducing false positives 85% and accelerating secure SDLC adoption across CI/CD pipelines.
- Established AI-assisted AppSec triage standards and pipeline guardrails for high-volume engineering teams.
- Tuned SIEM, EDR, and cloud-native detections for distributed microservices, improving actionable alert visibility.

- Aligned DevSecOps with Google Workspace and JumpCloud identity anchors; optimized Cloudflare WAF for production microservices.
-

Jun 2023 – Dec 2023 | Full-time

- Built in-house cloud observability platform unifying logs, metrics, and threat intelligence for investigations and squad-level visibility.
- Designed enterprise IAM, SSO, and Zero Trust infrastructure access models improving governance and auditability.

Maxim Order Service

Global food and goods delivery technology company · Regional collaboration: engineering and operations across 10 countries and 100+ cities.

Jun 2022 – Jun 2023 | Full-time

- Cut monthly AWS costs 25% and system downtime 30% via right-sizing, reserved instances, and ELK/Grafana/Prometheus observability.
- Accelerated infrastructure provisioning 35% with Terraform IaC and standardized platform security across multi-country operations.

Tofu

Japan-headquartered BPO and employer-of-record (EOR) platform technology company · Regional collaboration: GCP security, Sprinto compliance, and Auth0/OIDC for platform clients including GoGlobal.

Jun 2022 – Jun 2023 | Freelance

- Led SOC 2 and ISO 27001 certification readiness on GCP with Sprinto; coordinated evidence, control mapping, and remediation to successful certification.
- Closed hundreds of Sprinto-tracked vulnerabilities and cloud misconfigurations to zero, clearing audit blockers on GCP.
- Configured Auth0 client authentication for Tofu's BPO/EOR platform—including GoGlobal—with OIDC/OAuth2 flows and SSO for customer-facing services.

Virtualspirit

Malaysia-headquartered IT services and cloud engineering company · Regional collaboration: infrastructure and DevOps for clients including Malaysia's EV Connection.

Jun 2022 – Jun 2023 | Freelance

- Achieved 99.95% uptime architecting Kubernetes microservices for EV Connection; deployed 5+ production apps in six months with 98% successful release rate.
- Reduced cloud costs 30% and cut release time 25% through right-sizing, reserved instances, and optimized CI/CD pipelines.

Hungryhub

Thailand-headquartered restaurant reservation and food-tech platform · Regional collaboration: product and engineering teams for Hungryhub's Thailand market.

Jun 2020 – Jun 2022 | Full-time

- Achieved 99.8% uptime with Kubernetes and ELK-based monitoring, resolving 95% of issues before user impact.
- Drove 30% booking growth and 15% cloud cost reduction via performance tuning, auto-scaling, and reserved-instance strategy.

EDUCATION

Utel University

Computer Engineering | Jan 2023 – May 2025

Gadjah Mada University

Engineering Physics | Aug 2016 – Jul 2020

CERTIFICATIONS

- AWS Cloud Architect - Amazon Web Services (AWS)
- Certified Ethical Hacker - EC-Council
- Palo Alto Networks Cybersecurity - Palo Alto Networks
- AWS Security: Incident Response on AWS - Amazon Web Services (AWS)
- Google Cybersecurity Professional Certificate - Coursera / Google

SKILLS

Identity & access: IAM, SSO, SAML, OAuth2/OIDC, workload identity federation, CyberArk, Auth0, Google Workspace, JumpCloud, DLP Cloud security & SOC: AWS, GCP, Terraform, Kubernetes, Wiz CSPM, SIEM/SOAR, Wazuh, Google SCC, CrowdStrike Falcon, MITRE ATT&CK DevSecOps & engineering: CI/CD, GitLab, GitHub Actions, secret scanning, Cloudflare/AWS WAF, incident response, ISO 27001
